SUBJECT: Key SACG Results

This is FYI.

The key points in yesterday's SACG meeting were:

- The US appears on the verge of undertaking a complete reexamination of its military, strategic program needs and goals.
- The Interim Restraint report to the Congress is on a fast track (see attached game plan).

We are working hard to keep up with requests for intelligence support. This material will be in the book we are building for you for next Monday's NSC meeting.

I recommend that you have a discussion with key people about Interim Restraint policy. Attached is the latest version of the options.
